SUMMARY

Second-year Math and CS student at Georgia Tech with experience building full-stack web and iOS applications. Passionate about developing user-friendly, AI-enabled smart software solutions using modern frameworks and APIs.

EDUCATION

Georgia Institute of Technology, College of Sciences

B.S. Mathematics and Computing

Relevant Coursework: Object-Oriented Programming

Atlanta, GA

Transferred Aug. 2026 - May 2029

University of Virginia, School of Engineering

B.S. Computer Science

Charlottesville, VA

Aug. 2025 - May 2026

Relevant Coursework: Data Structures & Algorithms, Discrete Mathematics, Computer Systems & Organization, Linear Algebra

WORK EXPERIENCE

Altheros Capital, UI/UX Engineer Intern | Remote

June 2026 - Sept. 2026

- Built core frontend features, including the IV Score gauge, 'Viggie' mascot progression system, and Food Log, as part of a 7-feature v1 scoped in a complete PRD; used React, HTML, CSS
- Collaborated with a 4-person product and design team to translate app concept (vegan-native identity scoring, AI companion guidance) into functional UI ahead of app launch

Mathnasium, Math Tutor | Falls Church, VA

Oct. 2023 - June 2025

- Tutored one to four students per one-hour session in math levels ranging from counting objects to Calculus; logged student assessment results into database, print out student worksheet documents, and organize binders

RESEARCH EXPERIENCE

Georgia Institute of Technology — VIP Research, Undergraduate Researcher, [Unlocking and Analyzing Historical Texts]

August 2026 - Present

- Build OCR and computer vision pipelines to digitize historical texts (cuneiform tablets, Greek/Latin manuscripts) from inconsistent archival formats into machine-readable data
- Develop evaluation schemes to assess OCR/CV output quality and design scraping tools to normalize archival metadata across non-standardized library cataloging conventions

RELEVANT PROJECTS

Deep3D Stereoscopic Video Conversion App

Spring 2026

- Improved depth perception fidelity for neuroscience research for the UVA Cang Lab, designed and implemented a hybrid hardware–software system (dual-camera rig + ML pipeline + web app) to generate biologically accurate 3D video stimuli tailored to tree shrew vision

Budget Management App ([Gold Rush](#))

Spring 2026

- Let's users set budgets, track spending across different categories, and generate a report of transactions. Transactions are pulled directly from users' bank accounts via the Plaid API; used Firebase, JavaScript, React, Node.js

Grocery Supply Tracker ([CrisisCart](#))

Spring 2026

- Provides personalized supply lists for short-term crises based on the event and user characteristics, then shows nearby stores with those items in stock using crowd-sourced updates; used Node.js and React

Sustainable Recipe and Grocery Scanner App ([SaveRe](#))

Fall 2025

- Estimates expiration dates, tracks groceries, and gives recipes that use what you already have; used Next.js, MongoDB, Gemini API, Tesseract OCR

Blue Light Emergency Station Locator ([LiteLine](#))

Fall 2025

- Finds your real-time location, identifies the nearest blue light emergency station, provides a clear, safe walking route, and shows essential safety info; used React, TypeScript, JavaScript, Google Maps JavaScript API

LEADERSHIP EXPERIENCE

Girls Who Code Club, Executive Team Member | McLean, VA

Sept. 2023 - June 2025

- Organized Java & Scratch lessons, instructed 10 students, raised membership by 20%

Hope Chinese School, Teaching Assistant & Teacher | Pimmit Hills, VA

Sept. 2022 - June 2025

- Graded assignments & assessments and help students to better understand Chinese vocabulary and 6th-grade level math, resulting in improved test scores (3 hrs/week)

SKILLS

- **Languages:** Java, JavaScript, Swift, C, Assembly, Matlab
- **Frameworks & Tools:** React, Next.js, Node.js, Firebase, Git, REST APIs, Deep3D, AI tools (Cursor, Claude), Figma
- **Technologies:** API Integration (Plaid, Google Maps), MongoDB, OCR (Tesseract), AI Tools (Cursor, Claude), Raspberry Pi
- **Certifications:** Microsoft Azure Fundamentals (0B4B5M-BB50CD)
- **Awards:** AP Capstone Award (Developed research on quantum computing)
